SUMMARY

Proficient **Frontend Developer** with hands-on experience building scalable, high-performance web applications using **React.js, Next.js**, and modern JavaScript frameworks. Currently working on real-time, production-grade casino gaming platforms, focusing on interactive UI development, performance optimization, and modular architecture. Skilled in component-driven development, state management (**Zustand/Redux**), **REST API** integration, and building responsive, user-centric interfaces.

EDUCATION

Sage University, Indore
Bachelor of Technology (B.Tech) | ECE | CGPA: 8.20 **2019 – 2023**
12th passed (MP BOARD) Percentage- 65% **2018 - 2019**
10th passed (MP BOARD) percentage- 76% **2016 - 2017**

PROFESSIONAL EXPERIENCE

Frontend Developer

Solvebyte IT Solutions **Sept 2025 – Present**

- Engineered a scalable real-time casino gaming platform using Next.js (App Router) and React.js, implementing dynamic routing and a flexible game rendering system (iframe + internal) to support seamless integration of multiple game modules.
- Designed and standardized a reusable component-driven architecture with Tailwind CSS and shadcn UI, accelerating development speed while ensuring UI consistency and long-term maintainability.
- Optimized performance and delivered production-ready features by leveraging Zustand, lazy loading, and efficient rendering patterns, while integrating secure REST APIs, authentication, and i18n for responsive, pixel-perfect game experiences.

Frontend Developer Intern

CodeBetter **Jan 2023 – July 2023**

- Built responsive user interfaces using React.js and modern CSS practices
- Developed backend APIs using Node.js and Express.js
- Managed data using MongoDB and contributed to full-stack MERN features

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, React Native, Tailwind CSS, Redux Toolkit, Zustand
Backend Technologies: Node.js, Express.js (Basics)
Databases: MongoDB, MySQL
Tools & Technologies: Git, GitHub, React Query, Axios
Core Concepts: REST APIs, Component Architecture, Performance Optimization, i18n, Prompt Engineering

PROJECTS

Casino Lobby & Game Platform

- Architected a scalable casino lobby system with dynamic routing and centralized configuration for managing multiple games.
- Implemented a flexible game launcher architecture (iframe + internal rendering) to support third-party integrations.
- Developed reusable component-based UI system using Next.js, Zustand, and Tailwind CSS for consistent and efficient development.

PlayMatch – Turf Booking Platform (Super Admin System)

- Led end-to-end development of Super Admin panel, handling turf management, bookings, user control, and platform configuration.
- Designed scalable UI architecture using React.js to simplify complex workflows and improve admin efficiency.
- Integrated REST APIs with secure data handling, enabling real-time monitoring and control.

Casino Games Development (Crash, Keno, HiLo, etc.)

- Developed high-performance, real-time game UIs with responsive and pixel-perfect design using Tailwind CSS and modern frontend practices.
- Created reusable and modular UI components (betting panels, controls, modals), accelerating development across multiple game implementations.
- Optimized UI rendering and user experience to ensure smooth gameplay and consistency across devices and screen sizes.
